# Eco Sustainable App

**By-Dibyajyoti Swain**

# *Research and Problem Understanding*

Fast fashion significantly harms the environment through high carbon emissions, water pollution, microfiber release, and textile waste. Despite growing sustainability awareness, consumers—especially Gen Z—continue frequent purchases due to low prices, trends, and social media influence, leading to overconsumption and short garment lifespans. Existing sustainable fashion apps lack reliable supply-chain data, clear eco-impact insights, and effective user motivation, limiting their impact.

Our solution aims to promote sustainable fashion choices using real-time eco-impact scores, AI-driven recommendations, and reward-based engagement.

# SOLUTION– SUSTAINSTYLE

SustainStyle is a mobile app prototype that helps users make eco-friendly fashion decisions by:

- Scanning clothing products
- Displaying sustainability (EcoScore)
- Recommending greener alternatives
- Rewarding eco-friendly actions through GreenPoints

# DESIGN & PROTOTYPING TOOL

- The complete app interface was designed in Figma
- Includes:
  - Clean UI design
  - Clickable navigation
  - Simulated scanning experience
  - Interactive GreenPoints dashboard

Figma allowed rapid prototyping and realistic user interaction.

# Unique Features of SustainStyle

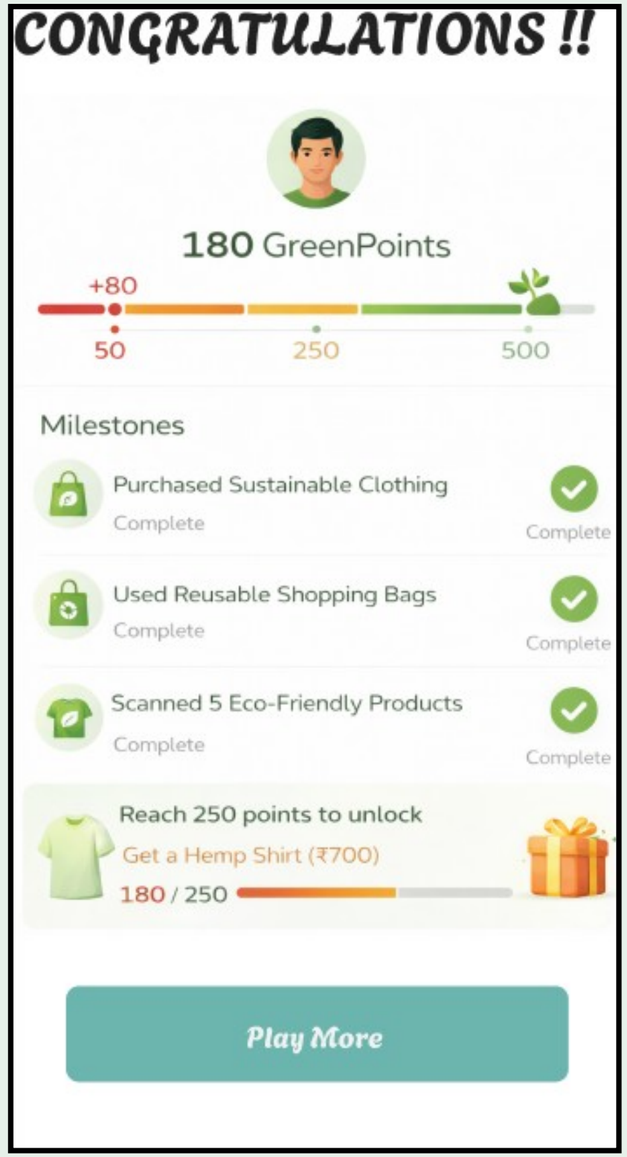

*Key App Features Implemented:*

- Multiple product scanning options:
  - Barcode scanning
  - QR code scanning
  - Style number scanning

- Instant EcoScore generation after product scan.
- Smart recommendations for more sustainable alternatives if the EcoScore is low.
- GreenPoints system to reward eco-friendly user actions.
- Milestone-based rewards, including free sustainable clothing on reaching target points.
- Eco challenges to motivate users to earn more GreenPoints.
- Supports products ranging from basic to premium quality, promoting sustainable choices across all levels.

# GREENPOINTS, MILESTONES & CHALLENGES

- Users earn GreenPoints for sustainable actions
- Progress levels shown using signal indicators
  - 50 points (Red)
  - 250 points (Orange)
  - 500 points (Green)
- Example milestone:
  - Reach 250 GreenPoints → Unlock a hemp shirt worth ₹700
- Weekly eco-challenges motivate continuous engagement
